

**Undergraduate Requirements**  
**Total Units for Options and Minors**  
**2017-18 Catalog**

The Core Institute Requirements for all options total 219 units. Requirements for the options range from 142-328 units. This leaves the average student with an approximate range of 0-125 “free” electives. That is, units not specified through the Core requirements or options requirements.

Please find listed below the total number units for each option and minor. The details can be found on the following pages. However, while the total number of units was captured, the nuisances and substitution possibilities for each option are not specifically indicated. Enrollment figures for each option are presented on page 7.
